

Reporting Suite

Analysis pumped to you, as it happens

Lombard Risk's ground-breaking Reporting Suite drives through all the barriers and proactively meets the surging demand for vital management information.

Break the mould: get rid of spreadsheets & vendor-specific reports. Eliminate waiting time, and dependencies on an army of specialists. Obtain dependable analysis - not just information - and real business visibility, real-time.

Whether for competitive advantage, or because regulators are demanding it, or for the simple reason that you know better management information is crucial to business management – Lombard Risk's Reporting Suite provides a stunning solution to your requirements. With more complex business models, and ever more invasive regulators, the need to know that your systems and controls are in place, and are in action, has never been greater. The solution delivers real visibility into any aspect of your business - not only the major risk ratios and trends. Dependable, auditable, and powerful management dashboards, distributed quickly, with impressive scalability via the Web give you superb cost advantages too.

Benefits which make the difference

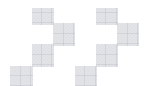

- ❖ Highly visible management information in a moment
- ❖ Easily scalable to fit business growth, in any direction
- ❖ Not restricted to any one data model
- ❖ High performance instance report viewing
- ❖ Dynamic user experience, graphical, attractive, informative
- ❖ High operational flexibility, fits your business as it changes
- ❖ Portable, reports anywhere, full history

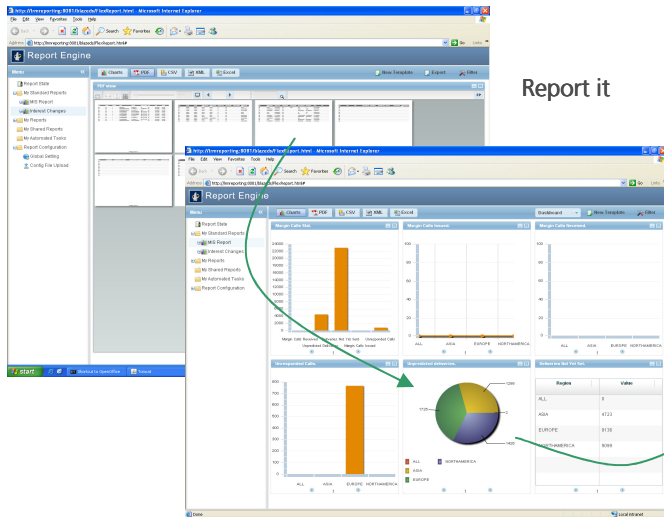

Extensive MI Presets Library to save you time

- ❖ Reconciliation reporting Preset
- ❖ Capital Optimisation Preset (by book, trends, stressed etc)
- ❖ Pillar III: Tables Preset
- ❖ Margin calls by region
- ❖ Variance Analysis Preset
- ❖ Time-Series Trends Preset
- ❖ Intercompany Transactions Preset
- ❖ Interest Rate Risk; Liquid Asset Buffer (and many others)

Obtain immediate reports, anywhere

- ❖ Timely decision-making support: dynamic monitoring for change events - results driven directly to you
- ❖ Cut out hours of internal time specifying, gathering, and building reports in spreadsheets
- ❖ Remove dependencies on internal experts: build reports yourself
- ❖ Curtail the Wait Time, whilst someone specifies what you want, whilst the data processes, whilst...
- ❖ Generate *analysis*, not just info, and certainly not just data (but you can have that if you want)
- ❖ Easy to use, and quick to implement
- ❖ Simple internal or external distribution though user-definable Web 2.0 screens, and via many save-as formats
- ❖ Interaction with regulators made easy – show them your reports in their office!
- ❖ Interaction with management made even easier – email them the intranet hyperlink
- ❖ Operationally suited to today's world: support for report Pod output to iPhone and iPad

Report it

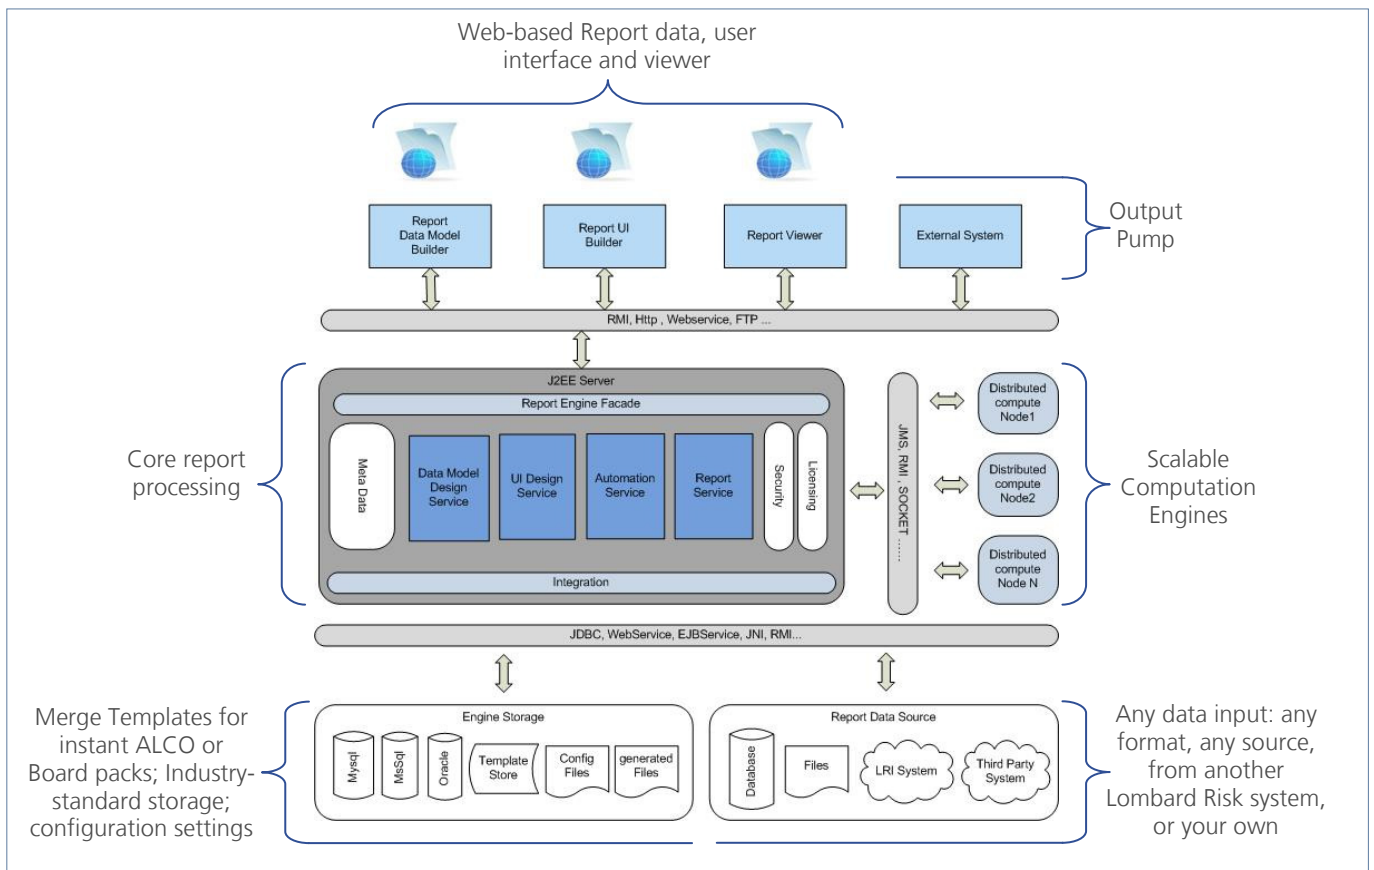

Graph it

Pod it

Feature-rich solution for punchy management information

- ❖ Unrestricted data input moulder, with easy to use ReportingXML generator
- ❖ Does not matter what your input data looks like, or where it is located
- ❖ Data from and to Web sources
- ❖ High level drillable graphs to exploded views, line-by-line or summary totals – whatever you need
- ❖ User-positionable, chooseable dashboards
- ❖ Shareable, queueable, drag-drop Reporting Pods for immediate event-driven distribution

Think of the potential in your firm: you know the level of effort and internal cost burnt on internal reporting. Lombard Risk's Reporting Suite provides for the automated routine production of management information reporting packs for internal or external consumption. Your reporting "Pods" (Trends in capital utilisation by line of business across entity? Currency liquidity risk within entity? Country exposures? What if?) are then inserted via your intranet into Microsoft™ templates you always use, and sent to you, perhaps on your Apple™ device to view selected graphical MI from the train, coffee shop, airport lounge, or in the comfort of your chief executive's or regulator's offices...
